Accuracy of the Level in the Laser Tracker

The FARO Laser Tracker has a level that is accurate to +/- 2 arcseconds. There are 3600 arcseconds in one degree, or 1 arcsecond is 0.000278 degrees. Relatively speaking, that is approximately +/-0.002” per 17” from the Tracker head.

NOTE: This applies for all models, the Vantage, ION, and X/Xi/SI Trackers.
