Scale an Imported Image in FARO Zone 3D

Import an Image

1. Click the **Import** icon in the **Home** menu, and click the Import Image icon.
   Or type **BI**.

2. Select the image and click **Open**.

3. Use the arrows to move the image to the desired location.

Scale the Image

1. Click the image.

2. In the **Image** window, click the **Image Scale** icon.
3. Position the image scale bar near a known distance.

4. Enter the correct distance in the **Scale Distance** field in the **Scale Tool** window.

5. Click **Apply Scale**.
